Alison Belle

Product Designer | Web Designer | Frontend Developer

alison.bellee@gmail.com | +61 452 255 014 | Sydney, Australia | LinkedIn | GitHub | Portfolio

Professional Summary

Product-focused Web Designer and Front-End Developer with 3+ years of experience designing and building responsive websites and web applications. Skilled in creating user-centred interfaces, wireframes, and high-fidelity UI designs while collaborating closely with engineers to deliver production-ready solutions. Experienced in translating business requirements into intuitive web experiences across CMS platforms and modern web technologies.

Professional Experience

Web Designer & Frontend Developer (Freelance) at AustraliaStudy

2021 – Now | Australia & Remote

- Designed and developed responsive websites using WordPress, Webflow, and Shopify
- Extended platform functionality through custom code, theme modifications, and plugin configuration
- Implemented JavaScript, HTML, and CSS to adapt layouts, interactions, and integrations beyond out-of-the-box capabilities
- Managed hosting, deployments, migrations, and environment configuration
- Debugged production issues through structured investigation and root-cause analysis
- Collaborated with clients to translate business goals into intuitive website experiences
- Created page layouts, UI structures, and navigation flows to improve usability

Product-focused Web Designer / Frontend Developer at ITScope

2022 – Now | Sydney

- Supported and enhanced 20+ live production platforms, handling frontend and backend updates
- Investigated and resolved bugs, configuration issues, and system regressions across CMS and custom components
- Improved platform stability, performance, and monitoring through iterative fixes
- Worked closely with stakeholders to prioritise issues and deliver reliable solutions
- Applied testing, QA, and rollback practices to reduce production risk
- Supported production systems by investigating incidents, identifying root causes, and implementing fixes to improve stability and reliability
- Investigated integration and configuration issues across multiple systems, identifying root causes and implementing fixes to maintain platform stability.

Cloud Engineering Apprenticeship (AWS, Project-Based) at CyberStriker

2022 | Sydney

- Built and tested AWS-based workflows using Lambda, Step Functions, IAM, EC2 and S3, gaining hands-on experience with cloud infrastructure, event-driven systems and operational monitoring
- Developed Python-based Lambda functions and integrated them with APIs
- Worked with JSON state machines, permissions, and event-driven execution
- Applied cloud security and performance best practices
- Gained hands-on experience with real cloud infrastructure, not just theory
- Implemented and maintained integrations between web platforms and third-party services using REST APIs.

Education

Graphic Design Advanced Diploma at Australian College of Business Intelligence

2025 | Sydney, Australia

Advanced Diploma of Information Technology at Kent Institute

2023 | Sydney, Australia

Diploma of Information Technology at Kent Institute

2022 | Sydney, Australia

Certificate IV in Web-Based Technologies at Kent Institute

2020 | Sydney, Australia

Certifications

- **Programming Foundations: Beyond the Fundamentals (LinkedIn Learning)**
- **REST APIs & Web Services (LinkedIn Learning, PluralSight)**
- **SQL Fundamentals (PluralSight)**
- **AWS for Developers (LinkedIn Learning)**
- **AWS Cloud Practitioner – in progress**

GitHub Projects

Fullstack Web Application

- Built a fullstack application using JavaScript/TypeScript, Node.js, and REST APIs
- Implemented frontend UI, backend logic, and data handling with a focus on clean, maintainable code
- Debugged issues, refactored features, and improved reliability through iterative development

Cloud & Backend Projects (AWS)

- Developed serverless workflows using AWS Lambda, IAM, S3, and Step Functions
- Built Python-based Lambda functions and integrated them with APIs
- Worked with JSON-based configurations, permissions, and event-driven execution

incidentpulse - Python CLI Tool for Log Analysis

- Built a Python-based CLI tool that ingests and structures application logs into validated events
- Designed data models and parsing logic to prepare logs for anomaly detection and operational analysis
- Focused on clean structure, validation, and extensibility rather than one-off scripts
- Applied real-world engineering practices including modular design, error handling, and documentation

Skills

Web Development
HTML5, CSS3, JavaScript (ES6+), Python (data handling, APIs), SQL (queries, relational databases), REST APIs (consume & integrate), Basic server-side scripting

Cloud & Infrastructure
AWS fundamentals (EC2, Lambda, IAM, S3), deployment workflows, website performance optimisation

CMS & Platforms
WordPress (customisation, plugins, migrations), Webflow, Shopify, Squarespace

Quality, Security & Systems
Web security best practices, Accessibility & WCAG awareness, Systems analysis & business requirements, Testing & QA processes

Design & UI Tools
Figma, Adobe Creative Suite, UI design, UI prototyping & wireframing, Responsive interface design, design systems, usability, accessibility

Working Style

- Problem-solving and debugging approach
- Translating business requirements into technical solutions
- Clear communication with technical and non-technical stakeholders
- Structured, delivery-focused workflow
